Novelties and Specialties in FLOWER SEEDS

The florist who fails to pay special attention to the many splendid new flowers misses a wonderful chance to present to his customers many worth-while new things which always sell well and usually bring a price considerably higher than that procurable from ordinary flowers. The novelties which we have grouped together on these pages are all outstanding in one way or another. No florist can afford to pass them by. They represent the finest of the new things for 1936; but there also are the best newer kinds of recent years. Take advantage of the opportunity to offer to your customers these new and improved varieties.

New Rustproof Antirrhinum

The careful work done in order to develop these strains of Rustproof Antirrhinum has proved a tremendous success as now it is possible to grow these flowers with the assurance that fully 75% of the plants will not be affected by Snapdragon rust.

Maximum Varieties

This strain has proved one of the most popular because of its vigorous growth and showy appearance. The plants reach a height of 3 feet and more with mammoth blooms artistically arranged on fine, strong, and long flower spikes. There are now available a number of very choice colors.

Alaska. A very attractive variety, and more floriferous than Maximum Showflake, bearing 12 to 14 base-branching flower spikes set with lovely white blooms of enormous size. Tr. pkt. 50c; ½ oz. \$2.00.

Campfire. This is a distinct new color in Antirrhinum—a pure luminous scarlet, free from any orange or bluish shades. Tr. pkt. 50c; ½ oz. \$2.00.

Canary Bird. Vigorous plants having 12 to 14 non-lateral stems closely set with appealing bright canary yellow blooms. Tr. pkt. 50c; ½ oz. \$2.00.

Loveliness. Pure soft rose-pink blooms that are an expression of loveliness. Produces 12 to 16 splendid spikes to a plant. Tr. pkt. 50c; ½ oz. \$2.00.

Copper Shades. Each plant carries 12 to 16 long vigorous spikes set with magnificent blooms in varying shades of copper, ranging from coppery old gold to brilliant copper-orange. Tr. pkt. 50c; ½ oz. \$2.00.

Crimson. The combination of fiery crimson flowers, dark green foliage, and dark plum-colored stems is indeed very striking. A vigorous grower. Tr. pkt. 50c; ½ oz. \$1.25.

Mixed. Contains all the rustproof Maximum varieties of Snapdragons so far available. Tr. pkt. 50c; ½ oz. \$1.50.

Maximum Snapdragons

New Rustproof Antirrhinum

Nanum grandiflorum

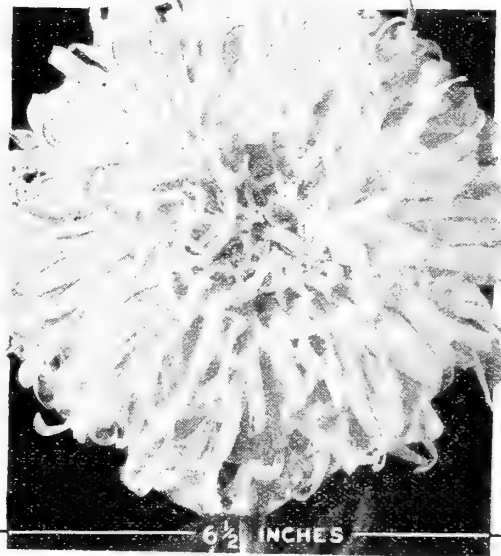

Majestic, The Pearl. Glistening white blooms similar to those of the forcing variety, White Rock, but more desirable because the plants are fully 75% rustproof. One of the largest flowering of all varieties. Tr. pkt. 50c; ½ oz. \$1.50.

Mixed. You will find in this mixture of half-dwarf Snapdragons a splendid range of desirable colors. A highly bred, rustproof strain. Tr. pkt. 50c; ½ oz. \$1.50; ¼ oz. \$2.50.

Majus grandiflorum

Mixed. Another excellent mixture of the Majus grandiflorum type. There are many splendid colors represented in this and the careful work done with it has resulted in 75% of the plants being rustproof. Tr. pkt. 50c; ¼ oz. \$1.50; oz. \$5.00.

Three Outstanding New Asters

Super Giant Aster, Los Angeles

Super Giant Los Angeles

This outstanding, giant flowering variety received an Award of Merit, 1934 All America Selections. It is a giant in size and has fully double blooms that measure 6 to 8 inches across. The gracefully and delicately interlaced flower petals give it an airy charm. The color is a beautiful shell pink. Of magnificent tall growth. Tr. pkt. 50c; oz. \$3.00.

Super Giant El Monte

Entirely new this year giving us an equally vigorous and free flowering variety as Los Angeles with blooms which are fully as large and handsome. The color is rich deep glowing crimson. As it is a non-lateral variety which branches from the base and yields plenty of cut flowers. Tr. pkt. 50c; oz. \$4.00.

Aurora Golden Sheaf W-R

An outstanding wilt-resistant Aster giving a most appealing novel effect. The double blooms have a full cushioned crest-like center set off beautifully by a single row of short ray petals. The color is the deepest yellow of any Aster yet developed. Splendid flowers borne on strong and somewhat branched stems. Tr. pkt. 50c; oz. \$2.50.

Novelties and Specialties

Outstanding New Marigolds

Marigold, Yellow Supreme

Yellow Supreme

There cannot be any doubt that Yellow Supreme is one of the most beautiful Marigolds ever introduced. In some ways it is a companion to Guinea Gold, yet again it represents an improvement in size and graceful formation of the blooms. The plants make a pyramidal growth, 2 to 2½ feet high, bearing gracefully ruffled double blooms that greatly resemble giant Carnations. It has an elusive sweet fragrance. Tr. pkt. 30c; oz. \$1.50.

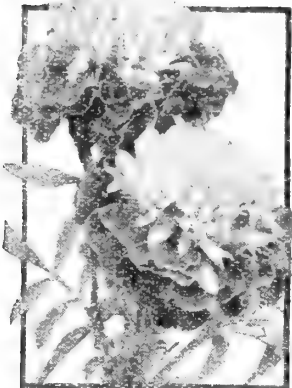

Mexican Orange

You are bound to enthuse about this variety fully as much as we did. In our opinion it is the most desirable of the rich golden orange varieties, growing about 3 feet in height and bearing great masses of very large, fluffy, round flowers of most refined form. They are fully double with more petalage than Guinea Gold but sufficiently loose in formation to be graceful and artistic. Tr. pkt. 40c; oz. \$2.25.

Guinea Gold

This is now so well known that there is no need to give a detailed description. The splendid pyramidal growth of the plants is a most desirable feature and the broad, wavy petaled, brilliant golden orange blooms are as vivid and charming as any flower can be. Its popularity no doubt also is due to the fact that it has none of the pungent Marigold odor. Tr. pkt. 30c; oz. \$1.50.

New Dwarf Double French Marigold Harmony

Marigold, Harmony

Every florist should have this new Marigold which has proved one of the most outstanding new varieties ever introduced. The plants grow about 12 inches in height and make a circular bush almost 2 feet in diameter, studded with graceful, colorful blooms with broad, gold-edged, mahogany brown guard petals and a high, thick cushion of golden yellow center petals. Tr. pkt. 30c; oz. \$1.50.

New Double Sweet-Scented Nasturtiums

Nasturtium, Glorious Gleam Hybrids

Dwarf Double Golden Globe

A really charming compact variety of well-rounded growth and free from any runners. Produces a great abundance of lovely sweet-scented blooms of the same rich brilliant golden yellow color as those of Golden Gleam. Its neat appearance and free blooming habit are two most important features. Oz. 50c; ¼ lb. \$1.50.

Golden Gleam

This is the original double sweet-scented Nasturtium which makes splendid little plants of moderately compact growth throwing out a few short runners. Bears great masses of lovely, large, double, golden yellow blooms carried on stems sufficiently long for cutting. Oz. 15c; ¼ lb. 50c; lb. \$1.50.

Scarlet Gleam

Brilliant scarlet blooms of quite different formation than those of Golden Gleam. The blooms are full petaled, gracefully waved, and beautifully fluted. They give a dazzling effect set against the bright green foliage. An ideal plant for garden use and for cutting. Oz. 50c; ¼ lb. \$1.50.

Glorious Gleam Hybrids

A magnificent strain which includes a great many lovely colors, such as salmon, golden yellow, orange-scarlet, cerise, cream, orange, maroon, and crimson shades besides some very outstanding and beautiful varieties marked with contrasting rich maroon blotches. The flowers are exquisitely scented and long stemmed. Oz. 25c; ¼ lb. 75c; lb. \$2.50.

Pansies

Dreer's De Luxe Swiss Giants Mixed

The acme of perfection in Pansies. Magnificent, large, well-formed blooms in a most varied and colorful assortment of the rare Pansy shades. The long-stemmed blooms are splendid for cutting and the compact growth of the plants makes them ideal for garden planting. Tr. pkt. 75c; ½ oz. \$1.75; ¼ oz. \$3.25; oz. \$12.00.

Phlox Drummondii

Gigantea Art Shades Mixed

There has not been anything new and very outstanding among the annual varieties of Phlox for some time, until this magnificent giant-flowering strain of art shades which is bound to be accorded a most welcome reception. The individual flowers measure 1¼ to 1½ inches in diameter, which in itself merits their introduction. However, it is the wonderful color range in soft art shades that is bound to enthuse you. There are many lovely shades such as salmon with white eye, deep salmon with cream eye, appleblossom-pink, soft rose with white eye, light blue, and violet with and without eye, mauve with eye, rose, and many others that blend beautifully and give untold charm to this fine mixture. There are no harsh colors to spoil their beauty. The plants grow about 9 inches high. Tr. pkt. 50c; oz. \$5.00.

in Flower Seeds

Beautiful New Petunias

Drer's Superb Double Fringed

We have been growing and perfecting this remarkable strain for many years and know that it the finest in the world. Compact, erect plants producing the largest, deepest fringed, and most double blooms we have ever seen. The color range is magnificent. 500 seeds 75c; 1000 seeds \$1.50.

Drer's Superb Single Fringed

Our own special selection of compact, erect growing plants covered with lovely flowers of largest size and most beautiful form. The blooms are deep throated, magnificently fringed, and come in a wide range of appealing colors. It has never been surpassed. Tr. pkt. 50c; 1/16 oz. \$1.50; 1/4 oz. \$2.50.

Petunia, Ruffled Martha Washington

Ruffled Martha Washington

A gracefully frilled and ruffled Petunia of dwarf compact growth, 9 inches high, forming perfect balls smothered with lovely frilled blooms about 3 inches in diameter. The fringe is flesh pink with wine red veins leading into the deep dark violet throat. It makes a striking picture. Tr. pkt. 75c; 1/32 oz. \$1.50.

Nana compacta, Rose Gem

This new compact Petunia grows only 5 to 6 inches high and it is smothered with masses of small blooms having the same lovely color as Rose of Heaven Petunia. It makes a splendid pot plant. Tr. pkt. 75c; 1/64 oz. \$1.25.

Nana compacta, Pink Gem

This resembles Rose Gem in compact growth and flowering habit but the blooms are a lovely soft rose color. Tr. pkt. 50c; oz. \$5.00.

Rudbeckia, My Joy

Rudbeckia, My Joy

It is hard to believe that an annual Rudbeckia could be so beautiful and marvelous as this splendid new variety. Those who have had an opportunity to see it during the past season will fully agree with us that it is a magnificent flower of highest decorative value. The plants grow about 2 feet tall. Growers should clearly understand that Aster Wilt and Aster Yellows are two distinct diseases. The answer to wilt is the use of wilt-resistant varieties but to prevent Aster yellows the plants should be grown in cloth houses to prevent leaf hoppers from carrying the disease virus to the Asters from weeds in nearby fields.

The plants form strong, well-branched bushes, 2 to 2½ feet high, bearing on long, strong stems their handsome Chrysanthemum-like flowers. The form of the flowers together with the length of the stems place them at the head of Asters for cutting. They are at their best during September.

Petunia, Dwarf Compact Sorts

Nana Compacta Mixed. A strain of dwarf compact growth. Each plant forms a perfect ball, 8 to 10 inches high and 12 inches across. Excellent for pot culture. Tr. pkt., 50c; oz. \$3.00.

— **Pink Gem.** This represents an entirely new type of Petunias forming showy, compact plants of dwarf habit, growing only 5 to 6 inches in height. This remarkable habit makes them desirable for beds, borders, and as pot plants. Pink Gem has lovely little flowers about 2 inches in diameter and their color is a lovely soft pink shade. The plants are a mass of bloom from midsummer until frost with the flowers so closely set together that practically none of the foliage is visible. Tr. pkt. 50c; ¼ oz. \$1.50; oz. \$5.00.

— **Rose Gem.** Rose Gem is a beautiful addition to the new miniature group of Petunias. The first of which was Pink Gem. Rose Gem no doubt will become even more popular because it has flowers of a richer color. They are a deep rose, a shade not unlike that of the popular Rose of Heaven Petunia. Tr. pkt. 75c; ¼ oz. \$1.25.

— **Ruffled Martha Washington.** This is a decided and most desirable break in Petunias which gives us a nana compacta Petunia with lovely ruffled blooms of exceptional beauty. The plants grow about 9 inches high and they form perfect little balls which are literally smothered with the dainty frilled blooms. The individual flowers measure about 3 inches in diameter. Besides the exquisite form of the blooms the colors also add considerably to their attractiveness. The frilled portion of the flower is a charming blush pink, whereas the center is strongly veined with brilliant wine red which deepens in the throat into a lovely deep violet. The veining is unique, resembling a Pelargonium in its exquisite beauty. Comes 100% true to color. Particularly fine for window boxes. Tr. pkt. 75c; ¼ oz. \$1.50.

Double Fringed Petunias

Great strides have been made within recent years in the development of double Petunias. As the production of the seed is a matter of very careful work it consequently must be expensive. Careful handling of the seed is recommended. It is the nature of the seedlings which produce the best double blooms to be somewhat tardy during their early development. Usually they appear as if they lack vigor and their foliage appears crumpled. The grower who realizes this will pay particular attention to this type of plants with the result that his crop will give him better results than those who do not understand the peculiar habit of double Petunias and go in for selecting the earliest and strongest seedlings when they do their work of transplanting.

Rose-Pink and White. We believe this is the most beautiful of all double fringed Petunias we have ever seen. The blooms are a bright rose-pink with a broad white frill. 500 seeds \$1.25; 1000 seeds \$2.00.

Rose Queen. The double blooms measure 5 to 6 inches in diameter. They are a glorious shade of bright rose-pink. The frilling of the petals is most graceful giving the double flowers a particular charm. 500 seeds \$1.50; 1000 seeds \$2.50.

Every commercial grower knows how important it is to start with seed of known quality. After all the cost of the seed is so small compared with the total expenditure involved in growing a crop. Good flowers always will find a ready market and bring a good price, whereas those of mediocre quality usually are a drug on the market. We, therefore, recommend to you that you make your choice from Dreer's Reliable Flower Seeds because we offer you the finest strains available.

Dreer's Gold Medal Gladiolus

Our Gold Medal Blends are made up entirely of named sorts, grown separately, and blended according to a carefully considered formula, so that there may be a proper balance of the various colorings and shadings. We know from experience that it is practically impossible to grow Gladiolus in mixture and have them give satisfaction to our customers. Such mixtures soon become loaded with less desirable but rapidly propagating sorts and the whole color scheme is thereby thrown out of balance.

In our blends we use only the finest named kinds and no variety enters into them that is not large flowering and of attractive color. Good texture, strong spike and artistic placement of the blooms are requirements of the greatest importance. All are sorts that are well worth growing individually.

Section One. The range of coloring extends from rich rose, through old rose, rose ash, orange-scarlet, and bright red, to deep crimson and velvety maroon. 30c per doz.; \$2.00 per 100; \$17.50 per 1000.

Section Two. From palest blush to warm deep pink and soft rose, from cream and primrose to citron yellow and salmon-orange, together with snowy and tinted whites and other sorts splashed or stained with deeper blending shades. The colorings of our Gold Medal Section 2 Blend always carry a strong appeal. 30c per doz.; \$2.00 per 100; \$17.50 per 1000.

Section Three. Pale lavender, deep blue, lilac, heliotrope, amaranth, and velvety royal purple—all of the rich "Pansy" shades have been garnered for this blend. 35c per doz.; \$2.50 per 100; \$20.00 per 1000.

All Sections Mixed. An actual mixing in due proportion of bulbs from the three numbered blends. If you want all of the possible worthwhile Gladiolus colorings, you should find them here. 30c per doz.; \$2.00 per 100; \$17.50 per 1000.

Primulinus Hybrid Gladiolus

These are most attractive, easy to grow, and sure to bloom. They lend themselves particularly well to interesting decorative effects and soft color harmonies.

In hot, dry locations, where other varieties would burn out, they will still give a wealth of flowers, but naturally they respond, like all Gladiolus, to high cultivation and favoring environment. The color range runs from primrose to rich orange, apricot, and crimson, but there will be shades of pink and rose as well, together with rare coppery hues. We offer a mixture of named varieties, grown separately, and blended to give a proper color balance. 25c per doz.; \$1.75 per 100; \$15.00 per 1000.

Dreer's Cannas in the New York Botanical Garden, Bronx Park, New York

The Roses offered here are all field-grown plants which have been kept in pots during the winter months, stored in cold houses or cold frames so that they will break away naturally in spring. They are the best possible stock for selling to the retail customer. The prices are for strong plants in 5 or 6 inch pots, according to the growth of the variety, for delivery during April, May and June. While we can make shipments of Potted Plants earlier if requested we prefer to book orders for these months only. Where prices are given "per 100" only, these will apply to any number of plants selected.

Florists need not to be told about the tremendous advantage of quality as it concerns Roses. Dreer's Select Potted Roses are bound to give you superior results. They are strong, field grown, two-year-old stock full of vigor and vitality. Our careful methods of handling them from the time they are dug until they reach you is well reflected in your results.

DREER'S SELECT Hardy Perennial Plants

Specially Grown in Pots for Outdoor Planting

The majority of the stock offered is pot grown. This does not mean that the plants have been altogether pot grown but that they have been field grown, dug, and potted up during the fall months. Such stock can be planted even late in the spring with practically no loss, whereas clumps seldom do well when planted late in the season. Our experience has been that a vigorous pot plant of proper size will, in nearly every case, give quicker and better results than the best so-called "field clumps."

**Hardy Garden Chrysanthemums
The World's Best Collection**

2-inch pots—Ready in March

For a quarter century we have been selecting and producing new varieties of Garden Chrysanthemums, constantly endeavoring to increase their desirability and usefulness for outdoor use. As newer, better, and harder varieties appear, we are obliged to discard many old favorites. You may rest assured that the newer ones selected in the same colors have qualities of superiority justifying their trial and adoption by you. Last year we were particularly successful in creating a fine lot of wonderfully superior varieties having Koreanum as one of the dominating strains. The increased hardiness of these has been demonstrated. In the 1936 set of ten offered below, we have succeeded in producing larger flowers with a greatly enhanced range of colors. In addition, the varieties in this set bloom from one to three weeks earlier than Korean crosses heretofore offered. They will have passed their prime before injury from severe frosts occurs.

Juno. Very dwarf, compact plants producing an abundance of single flowers which open as a coppery red gradually changing to a salmon flesh color as they age.

Truehedge Columnberry

Berberis Thunbergi pluriflora erecta

U. S. Plant Patent No. 110

A very desirable new Barberry which makes a beautiful upright growth that gives it exceptional value for semi-formal hedges. The leaves are larger and thicker than the Japanese Barberry and they are deeper green, glossier, and distributed in such a way as to give splendid density to the planting. The fall coloring of Columnberry also is richer and deeper than that of the common Barberry. Trimmed into hedge it gives a particularly fine effect. Its hardness and immutability to rust makes it as desirable for northern sections as in warmer climates. Fruits remain on the plant for a long time.

Buddleia—Butterfly Shrub,

Summer Lilac

Ile de France

This fine Buddleia, a French introduction, has quickly replaced the older varieties of this shrub which have been popular for so many years, because it is superior, not only in its brilliant coloring but the flower spikes are longer and more graceful. The plants also are of a better, more uniform shape.

The plant attains a height of from 3 to 4 feet, forming a symmetrical, bushy shrub. Every branch is terminated by a graceful, cylindrical spike 6 to 9 inches long. The fragrant flowers are brilliant rosy violet-purple. In bloom from the latter part of July to late in September.

3-inch pots, \$2.50 per doz.; \$15.00 per 100.

Corchorus—Kerria—Globe Flower

Japonicus fl. pl. This is a particularly valuable shrub because it combines many showy features. The habit of the plant is most graceful and the light green serrated leaves add much to its beauty. From June to October the bushes are covered with attractive, double, golden yellow flowers which are unlike those of any other shrubs. But even during the winter the bright green stems add a distinctive note to the garden. The plants grow about 6 feet high. Field plants \$3.50 per doz.; \$25.00 per 100.

Cotoneaster

Very ornamental shrubs with decorative fruits remaining usually throughout the winter. The dwarf varieties are nearly evergreen and while especially adapted for rockery plantings are equally effective planted in clumps in front of the shrubby border or mixed with the dwarf broad-leaved evergreens.

Franchetii. Tall, upright, densely branched shrub with spreading branches. Fruit orange-red; semi-evergreen.

Horizontalis. A low growing shrub with almost horizontal branches. Small shiny green leaves and orange-red berries produced in great quantity. One of the most effective evergreen plants for rockery or border planting.

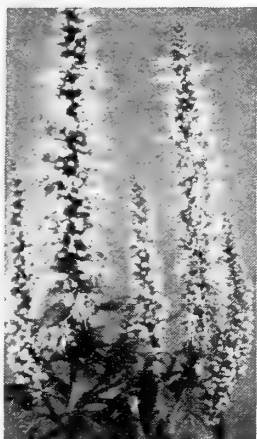

Praecox. A new Chinese variety with glossy foliage and large red berries by the end of June.

Salicifolia flocosa. A large growing shrub of graceful habit and willow-like foliage, bright red fruits extending well along the branches.

Any of the above varieties in strong, 5-inch pots:
50c each; \$5.00 per doz.

Daphne cneorum—Garland Flower

A pretty, dwarf, spreading shrub from 6 to 8 inches high, valuable for the rockery or for the front of the border. Has beautiful bright pink, sweet-scented flowers early in May. Strong bushy plants 8 to 10 inches in diameter. 75c each; \$7.50 per doz.; \$60.00 per 100.

**Elsholtzia
Farquhari**

This plant has the nature of the well-known Buddleia, but it grows only 24 inches high producing large, showy spikes of bright pink flowers in late summer and early fall. The entire bush, flowers and foliage, is sweetly scented. In addition to being very conspicuous in the landscape the plant also is outstanding for cutting and deserving of much more attention than ordinary plant material. We highly recommend this for cut flower purposes or for landscape planting. Strong field-grown plants 35c each; \$3.50 per doz.; \$25.00 per 100.

Erica—Heath

Most of these Heaths are compact, low-growing, and extremely useful for rockeries. The small foliage is densely arranged around the wiry stems, and both in full bloom or in mid-winter they make a very pretty picture. Give some protection the first winter to acclimate them. Semi-shady location.

Vagans (Cornish Heath). Compact evergreen shrub with dark green small foliage and pale purplish red flowers in August and September; 12 inches. A good rock plant for a semi-shaded position.

Vulgaris (Calluna vulgaris). (Scotch Heather.) A dense-growing shrub with erect branches covered with short, closely lapped leaves. The pretty, bell-shaped flowers are rosy lavender and occur in great profusion toward the tops of the shoots.

—**alba.** Pure white.

—**aurea.** A pretty gold leaved form of the white variety.

—**rubra.** Rosy carmine.

Any of the above varieties, 4-inch pots:
40c each; \$4.00 per doz.; \$30.00 per 100.

Red-Leaved Japanese Maple

Acer polymorphum atropurpureum. The most conspicuous of the medium-sized shrubs or small trees. Their beautiful shape and brilliant red foliage add color and variety to the landscape during spring and early summer. Strong plants, 18 to 24 inches high, \$1.75 each.

Nandina domestica—Chinese Bamboo

A very handsome small shrub, hardy as far north as Philadelphia. It grows about three feet high and has graceful, light green foliage which turns to a most attractive bronzy red early in the fall. The small white flowers are produced in good-sized erect panicles in spring and they are followed by crimson berries. Strong 5-inch pots, 50c each; \$5.00 per doz.

Osmanthus—Holly Osmanthus

Aquifolium. A beautiful, strong growing, Holly-like shrub with evergreen dark green, shiny, crinkly, spiny-toothed foliage. Attractive not only in summer but throughout the winter. Naturally grows in a shapely bushy form, usually from 5 to 8 feet high. Strong plants, 15 to 18 inches high, \$1.00 each.

Golden Variegated California Privet

Three-year-old bushy plants, 18 to 24 inches high, \$3.00 per doz.; \$20.00 per 100.

**Pyracantha (Crataegus) coccinea Lalandi
Firethorn, Evergreen Thorn**

There is no other fruiting evergreen shrub that is so attractive throughout the year as this Firethorn. It will succeed in any fairly sunny position, developing into a shapely plant 6 feet or more high. May be planted either in connection with other shrubs, as a single specimen, or may be trained with wonderful effect against a wall. Its large trusses of white flowers are followed in summer by an abundance of brilliant orange-scarlet berries, which, remaining on the plants throughout the winter, produce a gorgeous effect. Strong pot-grown plants 15 inches high, 75c each.

Viburnum Carlesi—Fragrant Viburnum

A rare Korean variety which is entirely distinct. Has sweet-scented salver-shaped flowers of a delicate rose-tinted white, passing to white. The flowers are produced in May in terminal subglobose cymes 2 to 3 inches in diameter. Good bushy specimens 2 feet high. 75c each.

Viburnum rhytidophyllum

A rare variety, particularly attractive on account of its large, dark green, nearly evergreen foliage. The yellowish white flowers are followed in September by red berries which finally turn black. 4-inch pots, 50c each.

Vitex macrophylla—The Rare Chaste Tree

In general habit similar to V. Agnus-castus but much stronger in all parts, the foliage being larger while the trusses of rich lavender-blue flowers are fully double the size. It blooms from July until frost, and is likely to become as popular as the Butterfly Shrub.

Field-grown plants, two-year-old, \$3.50 per doz.; \$25.00 per 100.

Select Hydrangeas

Young Stock in 2-inch Pots, for Growing on

The following list embraces the best of the standard varieties, as well as the best of the more recent introductions.

The stock offered is of last summer's propagation. The plants from which the cuttings were made are planted in the open field, where many of them have stood from ten to twenty years. The young stock is therefore very superior to such propagated from the blind wood of forced plants. It is not only 6 to 8 months older, but much more vigorous.

French Hydrangea
